

Cure for Liquor Habit

Give Orlene and Destroy All Desire,
Sold Under Guarantee.

Orlene is the most successful cure for the liquor habit that the world has ever known. It is a home treatment, given without publicity, detention from business or loss of time, and is absolutely guaranteed if the simple directions on each box are carefully followed. So remarkable have been the changes wrought for suffering drinking men by Orlene that leading ministers, charity workers, philanthropists and druggists everywhere recommend the treatment. Thousands of endorsements have been given for the remedy.

Read this one from the Quaker Drug Co., Seattle, Wash.

"During the past five years we have sold thousands of packages of ORLENE, and have never heard it spoken of except in highest terms of praise. We have dozens of people come to us and state that ORLENE has cured them or their husbands or dear ones from the curse of drunkenness. ORLENE is one of the few articles on the market that we can conscientiously recommend to our customers, and we do so daily, feeling that we have done what to us seems a duty as well as a service."

Orlene is prepared in two forms, No. 1, a powder, absolutely tasteless and harmless, given secretly in food or drink. Orlene No. 2, in pill form, is for those who wish to cure themselves. Orlene costs only \$1 a box. The Orlene box is a guarantee which entitles you to a refund of your money if Orlene fails to effect a cure. Write for Free Orlene Booklet (mailed in plain sealed envelope) to Orlene, 94 Orlene Building, Washington, D. C. Orlene is for sale in this city by N. D. Sevin & Son, 115 Main St. Orlene is a reliable and efficacious remedy for drunkenness and they will not offer you a substitute.

Corn Meal for the Hair.

A young lady dropped into the parlors of a Fifth Avenue hair specialist the other day, says The Beauty Magazine. The French woman in charge, who descended to tell some of the secrets of the profession, "My pompadour treatment is the most successful thing in vogue," she said. "The hair is taken down, shaken out and wet with gasoline. It is then combed, and when put up is found free from grease and dust. The gasoline should be used with the greatest care and never at night or in presence of a lighted gas jet or lamp. It takes a very few days, the quantity depending on the color and texture of the hair. With blond hair I follow this up with the cornmeal-brushing, a very coarse grade of yellow cornmeal being shaken on the hair and then carefully brushed out. It is astonishing to see how fluffy the hair appears after this treatment, and for days it remains in position, requiring no rain, puffs or braids." Asked what was the safest and best home preparation for keeping the hair healthy and retaining its natural color, she replied, "Madame" spoke very highly of the liquid tonic and hair food known as HAY'S HAIR HEALTH. This preparation has been on the market over twenty years and can be found at all good drug stores in 50-cent and dollar bottles. It is a great success because of the fact that it moults the roots of the hair.

formerly at Hodge's Stable, is now located in rear of No. 8 Franklin square, Tel. 574. m4719d

"PARTING THE RED SEA."

One of the Most Wonderful Recent Feats in Moving Pictures.

"Now that the novelty of the moving picture has worn off," said a man whose business is to think up new ideas for the film makers, "it requires a good deal of ingenuity to show the public something it hasn't seen before. In the early days of the business, there were one or two simple tricks that never failed to fool the average audience. But nowadays the old tricks won't do."

"For instance, one of the first stunts was to take a roll of pictures and then run it off backward on the machine. You could see regiments of soldiers marching backward down the street, and disappearing in the distance, or there was that old standby, the water sports film, which, when run the wrong way, showed men rising first out of the water, turning somersaults, and finally landing gracefully on the springboard overhead."

"Another reversible film which kept people guessing a long time was one which first showed a mass of clay, and then to take form and shape itself into the likeness of George Washington. How was it done? Simply by taking a wax image of the Father of His Country and slowly melting it while the photographs were being ticked off. Now when we ran the film backward, the melting process was reversed. But, as I said, these things don't go down any longer."

"I'd be surprised to know how resourceful some of the photographers are today. There is a film which has lately been sent out all over the country that marks the climax in the art of motion picture making. I don't believe one man in a thousand who sees it will have the least idea of how it was done. It represents the flight of the children of Israel, and 'as the some where Moses waved his wand and the Red Sea parted.'"

"The man who took the picture spent 12 hours on the Red Sea section alone. He singled out a spot on the shore of Long Island, where there was a sandbar which was out of the water at low tide and under water at high. He started at high tide and took, say, a score of pictures of the sea as it looked then. After 15 minutes, he reeled off another 20, and 15 minutes later he did the same. Thus at the end of six hours he had a film showing the changes for every quarter of an hour. At the end of that time the tide had receded so that he called in the seapers and had them walk across the bar while he took their picture."

"That was only half the work. Later in the day, when the tide began to rise, he returned and began again to take a few pictures every 15 minutes. At the end of six hours, the water had risen to where it was when he began. We had some doubt as to how the film would come out, but it did. It shows the water receding and then coming back again. But it did it in such a way that it looks more like a miracle than a feat. The waves seem to rush apart for a minute, and then back again, just as described in the Bible."—New York Evening Post.

Rev. P. C. Wright Vice President

Business Meeting of State Charities and Correction Conference

New London county was well represented at Hartford Thursday at the annual conference of the Connecticut Association of Charities and Correction. Present were: R. W. Mansfield of the New London Y. M. C. A., county probation officer; County Commissioner R. F. Williams of Mystic; Rev. C. N. Northing, probations officer of Norwich; and O. E. Jyther, also of Norwich.

Mr. Mansfield was elected secretary of the conference. H. H. Spooner, secretary of the Connecticut Temperance union, presided in the absence of the chairman, Mr. Spooner. The session was called away from the session and Rev. H. M. Thompson took the chair.

The session attended by the men from New London county was the sectional probation officers' conference, which was held in the morning. The question for discussion was probation especially juvenile courts. It was the general sentiment that juvenile courts are not needed in Connecticut, as in Hartford, New Haven and New Britain juvenile cases are disposed of at special chamber sessions and in the other cities of the state the boys' cases are well taken care of.

The following papers were read: Juvenile Courts, Judge Mathewson.

SURPRISE PARTY FOR MRS. D. W. CANNON.

Leaves Saturday for Her Parents' Home in New Jersey—Husband Shows But Little Improvement.

About fifty of the members of the church, gathered under the auspices of friends gave Mrs. D. W. Cannon a surprise party at her home, No. 175 Whipple avenue, on Thursday evening. The party was given by Mrs. M. J. Jackson and Mrs. Louis Epps. Mrs. Cannon leaves Saturday for New Jersey, returning to the home of her husband in the hospital in the morning. Her condition shows but little improvement, and she has decided to return to her parents for the present, at least.

There was an enjoyable evening passed and refreshments were served. The feature of the evening was the presentation of a check for \$150.00, the amount raised by subscription for her benefit, which was presented in behalf of the assembled body in a clever manner by H. D. McKelzie. In behalf of the Sunshine society she was also presented with \$30.00, all having been contributed by members and church members. The presentation was made and the gifts were made appropriate remarks.

FOUR BOILERS RECEIVED AT NEW PAPER MILL.

High Water is Giving Much Trouble at the New Dam.

The increasing volume of water pressing against the timbers at the new dam at the outlet of Oxbow is giving Supt. Elmer E. Lent of the Bigelow-Harriman Construction company and Engineer Taylor much anxiety just now. The water level rose steadily Wednesday and there was no perceptible abatement of the flood on Thursday. Supt. Lent said that the prospect was not bad enough to cause him to lose any sleep and that there was no great danger of the false work being swept away. The chief trouble is that, with the increased pressure outside the coffer dam the leakage is sufficient to hinder the concrete work going forward.

However, the pumps were running at top capacity all day and night and it was proposed to start up the big concrete mixer today. From the dam proper a wing ditch has been excavated on the west side of the brook, cutting slightly to the north, as it approaches the railroad tracks. This ditch, when filled with concrete, will be a component part of the dam structure, the whole being anchored to rock on each bank. It is admitted by the construction company that the work would have been done economically done just fall when there was but little water in the brook, but no doubt is entertained of the dam being built in a very short time now. The banks of the future reservoir have been cleared of trees, a number of large ones having been cut down this week between the pumping station and the old dye mill.

Owing to bad weather the demolition of the dye mill has progressed but little this week, and if the dam work goes on as rapidly as anticipated there is a possibility that the old mill site may be under water before all the material is removed.

At the new mill four boilers were received on Tuesday afternoon. Two were shipped from New London by lighter and were unloaded at the old wharf on Thames river. The other pair came from New London by rail and were unloaded from the new sidetrack running alongside the mill.

NEW PHARMACY LAW Necessary, Commissioner Says, for the Protection of the Public.

State Pharmacy Commissioner J. A. Levery of Bridgeport was asked the other day what he thought of the criticism of the state pharmacy laws passed by the last general assembly. The board of which Mr. Levery is a member is supposed to enforce the new laws which he has studied thoroughly. Mr. Levery said:

"One would think from agitation and publicity given to the new pharmacy laws by the public press that the pharmacists of the state were coming under the provisions of a pharmacy law for the first time. Chapter 216 of the Public Acts referred to as being unconstitutional is not a new section of the law. This has been a part of the pharmacy law since its inception. Nor is that section calling for the constant attendance of a licensed pharmacist new. The present law differs very little from the old law. It has simply been clarified to the status of assistant pharmacist created."

"A strict adherence to the law on the statute book is a necessary and pressing and burdensome than the present law as under its provisions the constant attendance of a licensed pharmacist is required."

"In an article recently published the claim is made that the pharmacists who got their legislation through the general assembly should be severely condemned. If this is true then 90 per cent. of the pharmacists of this state deserve condemnation. The pharmacy laws were reconstructed by pharmacists for pharmacists and submitted to all interested in the matter for acceptance or rejection."

"We question the right of anyone to say that any law pertaining to the health and safety of any community is unjust or burdensome, or that those responsible for any law which affords added protection to health and safety should be condemned."

"Second only in importance to the correct diagnosis of a patient's ailment is the properly compounded prescription. Can anyone question the necessity of a law which gives protection to the physician and patient alike in requiring that at least a preliminary knowledge of drugs and medicines, their nature and effect, be demanded of the persons in whose hands a prescription is placed to be compounded?"

AT BROADWAY THEATER.

Vaudeville and Motion Pictures.

Because of an accident, one of the acts for the Broadway theater was unable to get here on Thursday, but one to replace it will be on hand today to fill out the programme. J. W. Hollander & Co. a comedy team, is the attraction which will be seen for the remainder of the week to fill the vacancy.

George T. Adams, the black face comedian, had the crowd roaring on Thursday at all the performances, as his jokes and songs met with hearty approval. There was merit in his work, which was fully recognized, and he got hearty applause.

Little Aught and company, a Japanese novelty act, showed a number of tortuous foot balancing stunts on a picket fence, all of which were loudly applauded, while juggling and stick and glass balancing added to the pleasing combination.

The films of moving pictures are interesting views of western life, while there is plenty of comedy in them as well as instructive stories.

Manager Hanscomb has been called to Springfield by the illness of his son, who has appendicitis, and during his absence Howard Potter is looking after the work with his usual ability.

Woman Fainted.
A woman demonstrator, who was working in a Main street tea store on Thursday, became faint late in the afternoon and went to Udey & Jones' drug store for some medicine. While there she fainted away. A physician was called to treat her, and after she had recovered consciousness she was sent in a cab to her boarding place on Broadway.

Alderman Bent Spoke.
The Tammany Times of New York in its issue of February 26, had a two-column picture of Alderman F. P. Bent, and an account of his lecture on Patrick Henry before the Democratic club of the Twentieth assembly district in Brooklyn.

Cheshire.—George Watson has returned from his second trip to South America, and is the guest of his aunt, Mrs. Irene Woodbury.

THE Porteous & Mitchell COMPANY.

THE MARCH SALE

will be continued Today and up to and including Monday, March 14th.

During this Sale we offer Seasonable Items selected from every department in the Store, and reduced to tempting prices.

At the same time we are offering many large lots of most reliable merchandise bought at very liberal price concessions. All in all it is an occasion of unusual values and numerous money savings.

Then make it a point to visit this Store while this March Sale is in progress and get your share of the many Bargain Offerings.

EDISON PORTLAND CEMENT

makes the most durable and strongest grouting for brick or block street paving. Tar or pitch runs in hot weather, leaving the stones or brick to loosen and the street to deteriorate. Edison Portland Cement is Uniformly 10% Finest Ground in the World. Binds more sand, pours more easily and sets with a grip of granite. You can see for yourself after talking it over with

CRUTHERS & LILLIBRIDGE,
Norwich, Conn.
STRONGER THAN GRANITE

A Dealer Writes: We have three other makes of ranges—all good ones—but we cannot induce people to buy them after they have seen the

Crawford Ranges

After people see the Single Damper (patented) and realize that one motion—sliding the knob to "kindle," "bake" or "check"—absolutely controls fire and oven and that damper mistakes are impossible;

And after they see the Two Hods in the base and realize their convenience (one for ashes instead of the old clumsy ash pan and one for coal);

And after they know about the Crawford Oven with cup-joint flues, And the Patented Grates,

Why should they buy the others? Ask the Crawford agent, to show you, and write us for circular.
